

Local Funeral / Local Florist Co-operative Websites

We'll pay for it, manage it, and send you money each month. Your customers get a better service and you make more money.

1

What

Your funeral home receives a FREE state-of-the-art floral ecommerce website built to capture more sales through a better optimized website by www.epicFlowers.com. This new website does NOT replace your website, just the flower buying page(s). The website is branded with your logo, colors, etc.. and you have full access and control to the website and all orders. You then link your 'buy flowers' on your website to this new website. At the end of each month we'll send you a percentage of all sales.

2

Why

The online middleman selling flowers and coming between the traditional relationship of funeral homes and florists has hurt our industry. When the customers' orders aren't being dealt with by a middleman, there's less headaches on your end, more money to be made, a better quality of service, and a better product can be achieved.

3

How

To get started, let us know you're interested and we can set up a conference call with you, our web developer, and our shop.
